

**DEPARTMENT 13**  
**OPEN CLASS VEGETABLES AND HERBS**  
**SECTION A**  
**VEGETABLES**

- In selecting vegetables for exhibition, choose such specimens that would bring the highest market price. Do not select the largest; select marketable size specimens. If at all possible, do not mix varieties.
- The following factors are generally used by an expert vegetable judge:
  - Trueness to variety type. If at all, pick the specimens from one variety.
  - Uniformity in shape, size, and color
  - Be sure to pick out a perfect specimen, select others as similar as possible. Never mix specimens of different maturity and leave stems on where possible.
  - Protect from dirt, disease, infection, and mechanical damage. Select specimens that are perfect and show no blemishes of any kind.
  - Condition and maturity. Be sure that exhibits are of high quality.
- Read premium material carefully, following all rules and regulations. If an entry calls for 5 specimens, be sure to exhibit that number; do not enter 4 or 6. In any instance, your exhibits will be disqualified if the correct number of specimens is not entered.
- Each exhibitor is responsible for entering his vegetables in the proper class. Flat yellow onions entered in the globe yellow onion class will be disqualified.
- Exhibit your vegetables on white Styrofoam or heavy paper plates except where specifically told otherwise.
- Products must be made or produced by exhibitor except in commercial designated classes.
